

Say NO to Lilies

- ✔ Oriental, Stargazer, and Easter / Christmas Lilies are all **TOXIC** to cats.
- ✔ Each year thousands of cats are treated by animal emergency centers after ingesting lily flowers and leaves... some of these cats die from kidney failure.
- ✔ While other plants like poinsettias and tulips are considered toxic, the vast majority of cat plant poisonings in our area are due to lilies.
- ✔ Please visit AnnArborAnimalHospital.com/AnimalHospital/Resources/Forms/ for a copy of this poster to bring to your local grocery or flower shop ... **HELP US KEEP INDOOR CATS SAFE!**
